SERGIO BARRIENTOS

Enterprise AI & Platform Engineer | Regulated Infrastructure | Applied LLMs

Madrid, Spain | sergiobarrientose@outlook.com | LinkedIn | sergiiob.dev | GitHub

PROFILE

Platform engineer working in a BaFin/ECB-supervised bank, where I lead a RHEL 8 to 9 migration and help translate application requirements into secure, supportable infrastructure. Alongside enterprise operations, I contribute to internal Azure AI Foundry and Document Intelligence prototypes, have shipped two AI-enabled Android products, and publish hands-on work on local LLM deployment and inference efficiency. I am moving toward a customer-facing AI deployment role that combines technical delivery, structured problem solving, and clear communication.

RELEVANT AI AND SOLUTION EXPERIENCE

Enterprise AI exploration: Contribute to internal Azure AI Foundry and Document Intelligence prototypes for document-processing and workflow automation use cases.

Shipped products: Built and published IntelliAuto and IntelliFlow, Kotlin/Firebase applications with AI-assisted features, offline operation, and controlled backend boundaries.

Technical advisory: Work with Application Owners to turn service requirements into platform changes and troubleshoot across infrastructure and application layers.

LLM deployment: Run and benchmark GGUF models with llama.cpp across Intel, AMD, and RK3588 hardware, documenting latency, concurrency, KV-cache, and power trade-offs.

PROFESSIONAL EXPERIENCE

Linux and Virtualization Engineer | Deutsche Pfandbriefbank AG **Jul 2025 - Present**

Madrid | Regulated banking | Team supporting 300+ RHEL servers

- Lead the bank's RHEL 8 to 9 migration project, coordinating phased technical work, dependencies, validation, and lifecycle management through Red Hat Satellite.
- Build Ansible and Git-based workflows for repeatable deployment and controlled infrastructure change.
- Support hardening, patching, CheckMK monitoring, HA/DR activities, VMware, and banking-critical Linux workloads.
- Partner with Application Owners on requirements and incidents involving Nginx, Apache, Tomcat, JBoss, PostgreSQL, and SSL/TLS.
- Contribute beyond the core role to internal GenAI exploration using Azure AI Foundry and Document Intelligence.

IT Application Specialist / Linux System Administrator | Sopra Steria **Apr 2023 - Jul 2025**

Madrid | Norwegian railway-sector client | 100+ Linux and Windows servers

- Coordinated a five-person team supporting and patching a critical application environment, working with the customer in English.
- Troubleshot RHEL, Windows, Azure, identity, and application issues; automated repeatable tasks with Ansible and supported Satellite lifecycle activities.
- Managed incidents, service requests, and controlled changes through ServiceNow in an ITIL-aligned model.

SELECTED PRODUCTS AND TECHNICAL WORK

- **IntelliAuto:** Vehicle-management app with AutoMind AI, ML Kit OCR, encrypted offline storage, maintenance workflows, and Firebase services.
- **IntelliFlow:** Privacy-focused personal-finance app with offline-first storage, cloud sync, projections, and DeepSeek-backed spending insights.
- **Local AI engineering:** Reproducible model-serving and optimization work across llama.cpp, GGUF, Intel SYCL, AMD ROCm, RK3588, concurrency, and KV cache.

CAPABILITIES

AI / application	LLM prototyping, Azure AI Foundry, Document Intelligence, llama.cpp, GGUF, Firebase, Kotlin, REST/API integration
Platform / security	RHEL, Satellite, Ansible, Bash, VMware, SELinux, HA/DR, CheckMK, SSL/TLS, PostgreSQL
Delivery	Technical coordination, stakeholder communication, requirements translation, documentation, incident and change management

EDUCATION AND LANGUAGES

RHCSA, Red Hat Certified System Administrator (2024)

Technician in Computer Systems and Networks Administration, Madrid (2023)

Spanish: Native | **English:** Professional
